PATENT NO : 7,111,935 (10/760,229)  
DATED : September 26, 2006  
INVENTOR(S) : Kia Silverbrook and Tobin Allen King

It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

Column 15, Lines 31 to 54 (Claims 1 to 3), please amend to read:

1. A print media and printing fluid cartridge for a digital photofinishing system having a digital processor and a printer arranged to receive drive signals from the digital processor; the cartridge being arranged to be mounted removably in juxtaposition to the printer and comprising a roll of print media to be fed on demand to the printer from the cartridge, and the cartridge incorporating drive means for coupling with a print media feed drive mechanism and at least one removable printing fluid first cartridge.
2. A cartridge as claimed in claim 1 removably mounted to the digital photofinishing system in which the digital processor is arranged to receive digitised data that is representative of a photographic image and to process the data in a manner to generate a printer drive signal that is representative of the photographic image, the printer being coupled to the digital processor and being arranged to process the drive signal and effect page-width printing of the photographic image on the print media.
3. A cartridge as claimed in claim 2 wherein the digital processor is arranged to receive said digitised data from an input source selected from a scanning device, a computer disk, a digital camera output, a digital camera memory card, a digital file and an internet connection.
